

MobileReview

Audit Pack Analysis & Reporting App.

Table of Contents

- Solution Overview
- Architectural Details
- Application Features
- Benefits & Industry Applicability
- Summary

+ Solution Overview

- Leverages Mobility Services for day to day operation
- Poll Templates Upload support – customized check lists
- Audit Trail - time stamp, user (credential based), location (wifi, wireless) google maps integration (geolocation)
- Reporting and Export on demand - email, specific formats for ERP, CRM apps integration and processing
- Coherent & accurate workflow procedure for auditing

+ Architectural Details

- Solution support for both Cloud and Private Cloud (virtualization) implementation scenarios
- Customized features
 - Functionalities tailored to unique needs
 - Mobile app, browser and database integration
 - .Net/PHP web development, SQL database programming
 - OS oriented support : Android, Windows, iOS (iPad, iPhone) & custom app development

+ Application Features

■ Capabilities

- Defect Log – Record, photograph, note, describe defects
- Inspection Checklist – Convert your proprietary inspection forms/sheets to mobile applications
- Modify – Modify web/browser-based apps, add/remove questions and inspection criteria
- Inspection – Product/Sample inspection check sheets
- Cloud - Send data to cloud server
- Images – Photo document all items/Hand draw on screen

■ Security

- Secure SQL server, hosted cloud solutions
- Software licensing for hosting on clients internal server

■ Reporting & Remedy

- Advanced data handling software and analysis
- Statistical analysis of inspection data
- Chart/graph data to see trends – Line/bar charts
- Sort by defect type, location, date, manufacturing line

- Multi-level signoff check sheets to ensure defects have been addressed
- Automated notices to responsible parties
- Alerts when issues are not addresses on time

+ Benefits & Industry Applicability

- Historical data savings
 - Analytics & Statistics - comparisons of metrics evaluated, graphs formats
 - Offline access to audit data - session based, time based (periods), user based, etc
 - Coordinated comparisons and analysis between all locations of audit (private Cloud back office Application)
 - Plan - Do - Check - Act -> report & compare
 - Objective & argued data evidence
- Industries
 - Custom application development available for EHS, Quality, Defect Inspection and Production
 - Food processing and packaging lines
 - Pharmaceutical/Medical product quality control
 - Aircraft, automobile manufacturing
 - Consumer product manufacturing
 - Electronics

+ Summary

- Real Time visibility for fast decision making
- Data Mining and historical analysis
- Infrastructure agnostic leveraging Mobility services
- Centralized platform, insuring scalability for multiple locations data convergence
- Multiple data sources evidence (photo, video, app related check lists, audio recordings)
